

NO STITCHINGS method:

Almost seamless to achieve more comfort and lightness. The use of single-shell thermo-welded upper material offers two decisive advantages:

- use of thinner, that is to say lighter materials.
- removal of almost all stitchings.

The upper material is also more anatomic and encloses the foot better. Thanks to this technology, the upper material comes with larger vents for increased comfort.

AIRFLOW SYSTEM:

Thanks to its large openings, the ventilation system keeps your feet well ventilated. The lower opening lets fresh air into the shoe and the side vents consisting of a soft Airmesh fabric increase ventilation.

ZOLEN

PERFORMANCE PRO FOOTBED:

New lightweight, anatomic footbed, just as stiff as necessary to transfer all the power onto the pedal without any loss of energy.

PERFORMANCE ADVANCED FOOTBED:

New ergonomic footbed offers perfect fit while cycling.

S.L.W.2 twist closure:

The innovative, micrometric system SLW2 (Speed Lace Winch) allows a precise and fast adjustment of the cycling shoe.

S.R.S. closing system:

Absolute closing precision, minimized size and weight. The mechanism follows the anatomic shape of the foot to ensure maximum comfort and its design allows the shoe to be tied even while riding. Made of forged aluminum, very robust and easy to exchange.

INTEGRATED HEEL SYSTEM:

The new single-shell design of the upper allowed to integrate an efficient heel support directly into the structure, without the need of external elements.

3 LAYERS FULL CARBON SOLE

Full carbon sole: three carbon layers reduce sole thickness and increase stability. The AirFlow system prevents overheating of the bottom of the feet. Compatible with LOOK, SPD-SL, Keo, Speedplay (optional adapter, item 1949876) and Time Impact pedals.

NRG AIR CARBON REINFORCED SOLE

Nylon sole reinforced with fiberglass and carbon – this makes the sole stiffer and lighter and reduces the distance between the foot and the pedal. The AirFlow system prevents overheating of the bottom of the feet. Compatible with LOOK, SPD-SL, Keo, Speedplay (optional adapter, item 1949876) and Time Impact pedals.

SPEEDLIGHT 3D SOLE

Fibreglass reinforced nylon sole. Rubber studs provide excellent grip on every terrain and the 3D construction offers optimal power transmission to the pedals. Compatible with SPD-MTB pedals.

SPEEDLIGHT CARBON 3D SOLE

All power onto the pedals. The nylon reinforced carbon fibre base is co-injected to the outer polished TPU shell. The natural rubber studs ensure maximum grip.

VIBRAM BIKE'N WALK

Uitstekende grip door de Vibram mix. Optimale flexibiliteit tijdens het lopen, stevige omsluiting van de voet tijdens het fietsen en last but not least: met vuilafstotend loopvlak. Compatibel met SPD MTB pedalen.

VIBRAM SHARP-CLAW

Freeride sole with maximum grip on all surfaces, enhanced comfort when walking thanks to a stiff insert with excellent cushioning and the EVA Anti Shock midsole in the heel area.

X-CROSSBOW

Great support for the feet and excellent shock absorption in the heel area. The integrated insert with perfect cushioning guarantees stability on the pedals and high comfort when walking. Optimal grip on all grounds thanks to the natural rubber outsole. Compatible with SPD-MTB pedals.

CROSSROAD

Versatile sole. Thanks to its high stiffness and good roll-over behaviour, this sole can be used for both cycling and walking. Compatible with SPD-MTB pedals.

JAWS CARBON REINFORCED SOLE

Thermoplast sole reinforced with carbon. Rubber studs. Light, stiff and yet providing a good grip when walking. TPU sole with carbon part: two-part front sole made of a carbon fibre intermediate sole and an outer sole; back sole made of natural rubber offers maximum grip. Compatible with SPD-MTB pedals.

JAWS

Ideal for those who are looking for a technical sole and do not want to do without comfort and grip provided by a natural rubber outsole. Compatible with SPD-MTB pedals.
