

“The differing anatomy of men and women, especially in the posterior & urogenital region requires specific ergonomics in each case.”

Sport ergonomist Dr. Kim Tofaute,
Terry head of ergonomics

Due to the different pelvis
shape of men and women,
their sit bone angle on the
saddle is different, too.

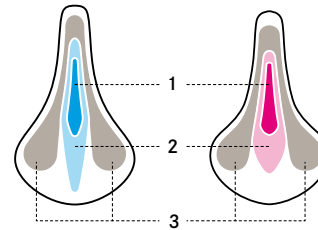

Maximum comfort as a standard!

Fisio Deluxe Gel

Anatomica Flex Gel

Fisio Deluxe Gel, Fisio Deluxe Gel Max and Anatomica Flex Gel with high tech shock absorbers from the car industry. Maintenance-free. Made in Germany.

1. Maximum relief:
2. Extended relief:
3. Dynamic pressure distribution:

Developed with the
German Sport University
in Cologne

Differences in the anatomy
require different relief zones.

3-zone comfort principle
specially for men and women.

No pressure in the urogenital region.

Gentle transition for minimum pressure.

Optimum pressure distribution
for changes to sitting position.

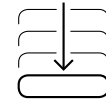

Mounted damper for
80 - 120 kg body weight

Replaceable damper for
50 - 80 kg body weight

Adapted to the body weight:
a set of extra dampers
is included.

**2,5 fold shock
absorption!**
