

### **Upper material:**

#### **MICRO FIBRE:**

Upper made from high quality microfibre material and mesh inserts. Breathable and dirt-repellent thanks to special surface properties.

#### **Vernice:**

Synthetic material with dirt-repellent surface properties. Easy to care for and hard-wearing.

### **Closure:**

#### **Caliper Buckle ratchet closure:**

This robust closure system made from plastic uses a fine-tooth ratchet, which makes sure the shoe is absolutely secure.

#### **Soft Instep 2 System:**

Anatomical instep band for more comfort lined with soft and thermoformed material. It distributes the pressure evenly over the instep and can be adjusted on both sides. Can be combined with Caliper Buckle instep band (item nos. 1336212 + 1909896).

#### **Soft Instep 3 System:**

Anatomical instep band for more comfort lined with soft and thermoformed material. It distributes the pressure evenly over the instep and can be adjusted on both sides. Can be combined with Caliper Buckle instep band (item nos. 1336212 + 1909896).

#### **Tecno-3 twist system:**

Allows extremely fine adjustment in the front area and adapts simultaneously to the upper material and the foot. It can be opened and closed easily, even while riding. The Tecno-3 System can be exchanged simply.

### **Features:**

#### **Adjustable Heel Retention Device:**

Individually adjustable heel adjustment. Offers perfect hold thanks to secure containment of the heel area.

#### **Heel Cup:**

Preshaped, reinforced heel cap. Reflective material at the heel cup and upper heel area.

### **Soles:**

#### **Vent Carbon Sole:**

Light carbon sole with ventilation openings. The air intake can be opened and closed, depending on requirements. The sole designed for top performance offers stiffness over the entire shoe body and slight flexibility in the toe area. The polyurethane heel is exchangeable (optional, item no. 1062344). Compatible with LOOK, SPD-SL, Speedplay, Keo and Time Impact pedals.

#### **Carbon Composite Sole:**

Nylon reinforced high performance sole with 40% carbon fibre: greater sole stiffness for more efficient power transmission. Screw-off, exchangeable heel. Compatible with LOOK, SPD-SL, Speedplay, Keo and Time Impact pedals.

#### **EPS Light Evolution Sole:**

Extremely thin nylon sole to reduce the distance between foot and pedal. Anti-slip rubber inserts on the heels increase safety while walking. Compatible with LOOK, SPD-SL, Speedplay, Keo and Time Impact pedals.

#### **Millenium III Sole:**

Nylon reinforced high performance sole with 30% carbon fibre. This increases the stiffness by around 40% compared with conventional nylon soles. Compatible with all standard LOOK, SPD-SL, Speedplay, Keo and Time Impact pedal systems. The Millenium III road bike sole also features a screw-on, exchangeable heel with anti-slip coating.

#### **Millenium IV Carbon Sole:**

High-quality carbon reinforced nylon sole in a new carbon look. The optimised carbon fibre content provides excellent rigidity and yet great comfort for the whole foot area. An anti-slip, replaceable polyurethane heel pad offers comfort when walking. Cleat alignment scale for a perfect positioning of the cleats. Compatible with all common road bike pedal systems.
