

! *Stems that are suitable for shaft outer \varnothing 28,6 mm ($1\frac{1}{8}$ ") can also be used for forks with a shaft outer \varnothing 25,4 mm (1") with a reducing sleeve (item no. 522566).

Please note that you may only combine stems and handlebars with the same clamping measure. For your safety, please change aluminium stems and handlebars after two years or 5.000 km at the latest. After a fall you should change these parts immediately.

Please note that forks with a shaft outer \varnothing of 25,4 mm are called 1" forks and those with a \varnothing of 28,6 mm are called $1\frac{1}{8}$ " forks in bicycle manufacturing. Screw connections, especially on those parts that are relevant for your safety, should always be mounted with a screw locking device.
